EDUCATION

University of Georgia Athens, GA *Bachelor of Science, Computer Science*

Spring 2025 - present

University of Colorado Denver, Denver, CO *Computer Science*

2022 - 2024

EXPERIENCE

Freelance Software Engineer / Atlanta, GA

2025 - present

- Designed, developed, and launched a production iOS social media application using React Native, Expo, and Firebase, serving 50+ active users and earning a 5 star App Store rating.
- Developed core features including user accounts, multimedia posts, comments, content reporting, blocking, and admin moderation, with Firestore and Firebase Storage supporting application data and user generated media.
- Collaborated directly with the client to define requirements and owned the development lifecycle from implementation and debugging to post launch improvements.

Endive Catering / Atlanta, GA

2023 - present

- Provide event setup, food service and professional client service at private catered events.
- Work in a fast paced environment, developing strong teamwork, time management, and problem solving skills.

PROJECTS

Hawk Nation iOS Social Platform

Spring 2025 - present

- Developed full-stack mobile app with React Native, Firebase, node.js with real time updates and cloud based media management.
- Engineered user accounts, multimedia posts, comments, reporting, blocking, and admin moderation using Firebase.
- Optimized app performance and resolved complex bugs across iOS devices and production builds, deployed to the app store.

Clocked in UGA Hackathon Webapp

Spring 2026

- Developed a SwiftUI study app using OpenCV and MediaPipe face detection to monitor user focus in real time.
- Integrated a Python Flask API with the iOS frontend and debugged deployment, networking, and port connection.
- Implemented camera manager logic, real time focus detection updates and UI alerts based on users focus.

Book Tracker App UC Denver App Programming

Spring 2024

- Collaborated on an Android book tracking application built in Java using Android SDK and XML.
- Developed the frontend and implemented an intuitive mobile interface for managing book information.

INVOLVEMENT EXPERIENCE

CodeHub Club | UGA

2025 - present

- Participating in coding workshops and collaborative projects to develop software engineering skills.
- Engage with peer programmers and industry professionals through networking events and technical talks hosted by CodeHub.

UGA Hacks Club | UGA

2025 - present

- Involved in hackathons and coding challenges, working in teams to develop innovative software solutions.
- Collaborate with students and industry mentors to expand knowledge of real world problem solving techniques.

SKILLS & INTERESTS

Programming Languages: Java, C++, C, Python, JavaScript, Swift, Assembly

Frameworks/Software: VSCode, Firebase, Node.js, Xcode, React Native, GitHub, Swift UI, Emacs, CentOS, Unity, Blender, Matlab

Relevant Coursework: Data Structures, Algorithms, Software Development, Systems Programming, Computer Architecture, Theory of Computing

Interests: Mobile App Development, Running, Hackathons, Language learning, Skateboarding
